

Protect your crew, your passengers, and your planes.

Battery Fire? Augment Your Safety Protocol with the EDE.

The EDE fire suppression kit uses CellBlockEX technology to quickly extinguish flames while simultaneously reducing toxic smoke and hazardous fumes. On the ground, it may be used as a stand-alone solution to extinguish a thermal runaway event in a personal electronic device (PED). In the air it is used in conjunction with any fire suppression or containment bag – it extinguishes the fire so the device can be safely handled and placed in the bag.

The EDE kit offers a versatile approach to handling a lithium-ion battery fire by providing the tools you need. The EDE kit contains:

- 2 PED-Pad fire suppression pillows
- 2 LIBIK Fire Shield Blankets
- 2 Pair CellBlock high-heat gloves
- 2 Safety goggles
- 2 3M masks
- 1 Small prybar

The red EDE storage bag is constructed of the same flame-resistant fabrics as the LIBIK Fire Shield Blankets. It is not intended to replace a fire suppression bag, but it may be used by a first responder in the containment or cleanup of an extinguished device.

Safe. Simple. Effective.

With the occurrence of PED fires on the rise, the need for safe solutions is paramount. Make the EDE part of your "best practice" solution.

The EDE Kit weighs just under 5.5 kg (12 lbs.) and measures 28 cm x 38 cm (8"x11"x15"). It will easily fit in an overhead compartment.

No water or halon is needed.

The EDE uses CellBlockEX dry fire suppressant media to extinguish a thermal event AND reduce toxic smoke and hazardous fumes.

The EDE

2 PED-Pad pillows containing CellBlockEX

Place over the device to suppress flames and reduce hazardous smoke.

2 pair CellBlock gloves

To aid in handling an overheating device.

2 LIBIK Fire Shield Blankets

Use as a shield or an additional suppressive layer when extinguishing a thermal event.

2 Masks and Goggles

For additional protection during a fire.

Small Prybar

Open a jammed overhead compartment, or free a device that has fused to a tray table. (optional)
