

Safe Storage for Personal Electronic Devices

The CellSafe® Sleeve

Engineered protection for lithium-powered devices.

The CellSafe® Battery Sleeve offers proven protection from thermal runaways in a thin textile construction.

- Proprietary high-performance composite sleeve has been 14 CFR tested and rated for 2000°F for 30+ minutes.
- Perfect for short-term storage of devices destined for return, recycling or repair.
- Rated for **up to 185 Wh** devices.

SKU	Sleeve Size
CSENV715	15" x 7" 38cm x 18cm
CSENV1215	14.5" x 11.5" 37cm x 30.5cm

Need a safe and reusable shipping solution? Ask about logistics support and our DOT Special Permit 20910 CellSafe Envelope Kits.

Easy Implementation

- Store multiple devices in close proximity. **Use one sleeve per device** to effectively isolate and contain the potential of thermal runaway.
- Available in two standard sizes to accommodate laptops, tablets, phones, and other small personal devices.
- May be purchased in packs of 10, 25, 100 or in bulk.

Safety Made Simple

- Sleeves are reusable - perfect for repair shops storing customer devices overnight.
- Slim profile design maximizes storage space. Ideal for evidence rooms or busy IT departments.
